# Administration of Local Anesthesia for the Dental Hygienist

The registered dental hygienist will receive the required hours in both the didactic instruction and the clinical experience for Florida certification. You will learn the neurophysiology, armamentarium, techniques of local anesthesia administration, local and systemic complications and the pharmacology of local anesthetic agents. Learn to safely and effectively select and administer local anesthesia.

## 2015 Course Online Start Dates:

Feb. 16

May 26

Sept. 21

Online content is self-paced

## *Don't just observe local anesthesia administration, experience it first hand.*

SPC is the largest dental hygiene program in the region. Joan Tonner, CRDH, BSHS, MA has been teaching it since 2001 and is the lead instructor for this highly interactive course.

Personal malpractice insurance is encouraged, but is not required. You will be required to complete and sign SPC's Conditions for Student Participation, Release of Liability and Medical History forms..

## Refund/cancellation policy:

Refunds will be given with written notice one week prior to the online component of the course opening. There will be no refunds or transfers if you are unable to complete the online component of the course or attend the clinical labs. You must complete the online portion of the course and attend and participate as a patient subject all four lab days in order to receive your Certificate of Completion. SPC reserves the right to cancel the course or close registration based on space availability.

*If unable to provide the items above, please contact Program Director at [tonner.joan@spcollege.edu](mailto:tonner.joan@spcollege.edu) upon registration to determine ability to participate in the course.*
