Japan

Though this course deals with International Relations (IR), as part of study abroad, it will specifically focus on Japan. Through this study abroad opportunity, where SPC students will get to experience a different culture and learn in a foreign context, attention would be paid to relations between Japan, its neighbors, and the United States and how the Japan experience can inform life in different settings such as the U.S. Beyond an introduction to key theories and concepts of IR, such as states and non-state actors, the course will attempt to cover topics such as the modern Japanese state, the place of Japan in world affairs, and international cooperation, to name a few.

Generally, students can look forward to visiting multiples historical sites dealing with political, economic, and social issues in Japan. This includes Himeji Castle, Japan's largest castle; the city of Hiroshima where the atomic bomb was dropped on August 6, 1945; various Shinto shrines and Buddhist temples found throughout the country and many more as detailed in the accompanying program itinerary.
