St. Petersburg College Nutrition/Weight Management Program

Thank you for scheduling your individual nutrition counseling for wellness appointment. We look forward to assisting you in your goal to manage weight, cholesterol and blood pressure. Please be sure to obtain a signed referral from your primary care provider in time for your appointment identifying one of the conditions listed above.

While there are many medical conditions that can be improved through nutrition counseling, nutrition therapy for complex illnesses cannot be addressed within the 30 minute, wellness session. For all other medical disorders we recommend that you make an appointment with the dietitians directly:
For Morton Plant Hospital: 727/462-7459
For the Life Help Center at St. Anthony's Hospital: 727/820-7910

Please complete Participant information. Have your primary care physician provide diagnosis, sign order and fax to number below.
